Sir:

Referring to the Information Disclosure Statement filed March 9, 2006, the inventor herewith identifies a U.S. patent which is a counterpart to WO 2002/27490 of May 2000.

Furthermore:

WO 98/41295 discloses a wheel which is intended for inline skaters and wherein to achieve a predetermined braking behavior when the skater moves transversally, a toroidal tire is provided which can turn about its own axis and thus allows a respective braked lateral movement of the wheel. This wheel is not able to simulate the riding behavior of a ski in deep-snow skiing or allow operation in rougher terrain.

Respectfully submitted,

DYKEMA GOSSETT PLLC
